

The BEKON group constructs at home and abroad dry fermentation plants to produce biogas and electricity from organic waste.

Due to the fast-growing domestic and international market, we are looking for a

Service Technician (m/f) for biogas projects

Your assignment:

- Undertaking routine maintenance and elimination of error warnings at the BEKON plants
- Contribute to the improvement of the service portfolio in cooperation with supervisors, colleagues and customers
- Execution of upgrading measures for existing installations
- Support in commissioning of new plants
- Support for the enforcement of warranty claims, particularly through good documentation
- Management of warranty claims in coordination with the engineering department and external contractors
- Assisting in the organization process in the Service & Commissioning department

Your qualifications:

- Technician of electrical engineering or mechatronics
- High social competence (external and internal)
- Structured and careful work
- Excellent communication skills and friendly demeanor
- Willingness to travel
- Basic English knowledge

What you can expect:

- An entrepreneurial task in a rapidly growing company
- National and international projects – also outside Europe
- An attractive company with flat hierarchies, a very motivated team and good working atmosphere

Versatile and future oriented - your tasks are demanding. You can expect an interesting workload and we look forward to hearing from you!
